

I would like to object to the FCC no call resolution pre-empting the more conclusive Indiana No Call List. I have been very satisfied with the state no call list as it right now. I would certainly be most unhappy at having my privacy interrupted by any company that I did not personally contact for a specific product or service. I do not wish for any company that I am currently doing, or previously done business with to contact me by phone to sell a product or service that I have not inquired about. That is what the U.S. Mail is for.
Thank you, Virginia Hawk
